

COMPENG 2SH4 Project – Statement of Contribution

Your Group Name: Course-project-guoa31-lin422

Your Name: Andrew

Your Team Member's Name: Cameron

You must complete this statement of contribution without discussing it with your project partner, i.e., individually. Your statement should be concise (at most one-and-a-half page). It has three parts:

- Tell us about your own contribution to the development of your COMPENG 2SH4 project. For example, you can tell us about which project iterations (as mentioned in the project manual) and C++ project classes that you worked on and completed. You can provide a concise answer either in paragraph form or through bullet points.

For the development of the 2SH4 project I was individually responsible for iterations 1A and 2A. Working together I contributed towards iteration 0 and 3.

- Repeat Part 1 above but this time tell us about your project partner's contribution to the development of your COMPENG 2SH4 project.

For the development of the 2SH4 project my partner was individually responsible for iterations 1B and 2B and working together also contributed towards iteration 0 and 3.

- Tell us about your experience in your first collaborated software development through this project – what was working and what wasn't. If you are a one-person team, tell us what you think may work better if you had a second collaborator working with you.

In this project, collaboration was extremely important and we organized meetings to divide our work into our respectable iteration parts. What we did really well was making sure that our respective iterations were completed by deadlines set by ourselves.
