COMPENG 2SH4 Project – Statement of Contribution

Your Group Name   Project-guoa31-lin422

Your Name   Cameron Lin

Your Team Member's Name   Andrew Guo

You must complete this statement of contribution without discussing it with your project partner, i.e., individually. Your statement should be concise (at most one-and-a-half page). It has three parts:

1. Tell us about your own contribution to the development of your COMPENG 2SH4 project. For example, you can tell us about which project iterations (as mentioned in the project manual) and C++ project classes that you worked on and completed. You can provide a concise answer either in paragraph form or through bullet points.

In this project, I was responsible for the iterations of 1B and 2B. Furthermore, I contributed to the overall comments of the project and contributed to feature 1 and 2 of iteration 3 and the bonus.

2. Repeat Part 1 above but this time tell us about your project partner's contribution to the development of your COMPENG 2SH4 project.

My partner was responsible for the iterations of 1A and 2A and contributed to iteration 0 and feature 3 of iteration 3.

3. Tell us about your experience in your first collaborated software development through this project – what was working and what wasn't. If you are a one-person team, tell us what you think may work better if you had a second collaborator working with you.

I think the experience was quite good. Being able to meet up with another member helped to understand the various parts of the code and split up various parts of the code. Working with GitHub was also an enriching experience and helped develop my skills in collaborating.
